NEED COMPRESSED AIR?

compressed air

5 GOOD REASONS...

to finance through The Leasing Centre

Acquire your air compressor today by taking advantage of a cash flow friendly plan through our partner, The Leasing Centre. Spread the cost of your air compressor system over its useful life with the flexibility to upgrade as your future needs change.

1. CASHFLOW FRIENDLY PAYMENTS

You can acquire your air compressor through predictable monthly payments without having to use valuable cash or budget for capital expenditure.

2. MAXIMISE YOUR TAX POSITION

Rental and Operating Leases are tax-friendly methods of acquiring business equipment. Because the equipment is not on your balance sheet, monthly payments may be 100% tax deductible and you don't have to worry about asset depreciation. It's a highly cost-efficient way to pay.

3. PAY FOR YOUR AIR COMPRESSOR EQUIPMENT AS YOU USE IT

Why pay for your air compressor upfront before any benefits have been realised? Instead, spread the cost of the equipment over its useful life through monthly payments that suit your business needs.

4. FINANCE IS FLEXIBLE

You can upgrade or replace unsuitable equipment, during and at the end of the agreement, without having the disposal risks and costs. This allows you to stay competitive and reduces your risk when acquiring equipment. Why lock yourself into ownership when the equipment may become obsolete or unsuitable for future business needs?

5. FINANCE IS SIMPLE WITH THE LEASING CENTRE

If you've ever tried arranging business finance from a bank, you'll find The Leasing Centre is a refreshing alternative. To us, you're a valued partner, not just an account number. Your dedicated Account Manager will work with you one-on-one to develop the best finance solution for your business.
